Surrogacy coordinator/contact person:

Contact details:

SURROGATE REQUIREMENTS

Clinics may have specific requirements for a surrogate and can refuse treatment of your surrogate if she does not meet them. Fact finding at an early stage may change your choice of clinic or choice of surrogate.

Recommended surrogate BMI:

Recommended surrogate age:

Disqualifying obstetric conditions:
(eg number of births/c sections)

Disqualifying medical conditions:

Disqualifying medications:

Required vaccinations:
(eg COVID)

Other surrogate requirements:

CLINIC PROTOCOLS/TREATMENTS OFFERED

Clinics may only offer certain protocols/treatment. Surrogates may have their own preferences with regards to the treatment they have. Finding out if a clinic will support your surrogate's protocol of choice at an early stage may change your choice of clinic or your choice of surrogate.

Recommended protocol for surrogacy:

Recommended medications used for surrogacy:
(Surrogates may have a preference on brand of medication or may have had an adverse reaction to a certain brand in the past)

Type of IVF offered:

Medicated:

☐

Mild (progesterone only):

☐

Natural (no medication):

☐

COSTS FOR SURROGACY

Whilst clinics may not be able to give you a detailed quote until you attend a consultation, you should be able to obtain approximate costs for certain aspects of your surrogacy treatment.

Cost for consultation:

Cost for virology screening:
(per person)

Cost for IVF treatment cycle:

Cost for embryo freezing:

Cost for IVF medication:

Cost for frozen embryo transfer:

Cost for donor egg cycle:

Cost for genetic testing:

Cost for counselling:
(per person)

Cost for surrogacy administration:

GENERAL CLINIC INFORMATION

Do you have sister clinics/other locations that can be used by our surrogate?

Do you accept embryos from other clinics?
(what freezing methods can you accept)

What are your timescales for treatment?
(is there a wait for surrogacy patients)

What are your success rates?
(are they based on 3 x transfers)

How long would we have to wait to be matched with an egg donor?

How many surrogacy cycles a year do you do on average?

What add on treatments (if any) do you regularly use/recommend?

What emotional support do you provide?
(and is that available to the surrogate also)

Do you have a surrogacy coordinator/surrogacy specific fertility nurse?

RECOMMENDATIONS

Personal experience and recommendations from the SurrogacyUK community is invaluable. It can help you understand how a clinic works, what they do well and what to be aware of.
